- Unity
- GitHub

AREA OF INTEREST

- HTML, TAILWIND CSS, REACT JS
- JAVA

LANGUAGE KNOWN

- Tamil
- English

CAREER OBJECTIVE

A dedicated and motivated professional seeking a responsible role in a respected organization. Eager to contribute hard work and skills to achieve company goals.

PROJECT

DPBH Hackthon

Topic:User Interface Deception

We focused on reducing manipulative slogans that mislead users into buying unwanted products. Our solution alters these deceptive elements to provide clear, honest information, enhancing user experience and promoting ethical design practices.

SIH Hackthon

Topic: Unity VR Forest Adventure for Students

Developed a Unity VR game for school students, featuring a virtual forest with animated wildlife to create an engaging educational experience. This project involved creating realistic terrains and animating animal behaviors, enhancing my knowledge of the Unity game engine.

INTERNSHIP

Company name:Esandhai

During my 30-day internship at ESandhai, I focused on web development using HTML, CSS, and PHP, and conducted customer dropout analysis by communicating with 2000 customers. This experience enhanced my technical skills and provided insights into customer behavior, equipping me with practical knowledge in customer analytics.

ACHIEVEMENTS

- Received the Best Student Co-Curricular Award at Kongu Engineering College Annual Day Function.
- Awarded third prize in a college-level ideathon for a concept on agriculture supply chain management.

COURSE COMPLETED

- Successfully completed a course in AR/VR using Unity Engine software.
- Successfully completed a course in MongoDB for SQL Experts.
- Successfully completed the 30-Day MasterClass in Full Stack Development conducted by NoviTech R&D Private.
